

# River Herring Network Spring 2016 Workshop

## INVITATION

Thursday, March 31 from 1:00-4:00PM

Jones River Landing – Kingston

FREE – But attendance capped at 20 people

The Jones River Watershed Association is scoping out a dam removal project on the Jones River in Kingston. River Herring Network members are invited to a workshop at the Jones River Landing building at 55 Landing Rd to learn about the project and help the Association think about their next steps. The dam has effects on tidal flow, upstream flooding, water quality, and of course, fish passage.

This is an opportunity to assist and to learn. The workshop will begin indoors and then the group will go outside to visit the site.

Please email Abigail Archer [aarcher@barnstablecounty.org](mailto:aarcher@barnstablecounty.org) to RSVP. Attendance is limited to 20 people.

Jones River  
Watershed  
Association
